

Inertia Switch Acceleration Switches

Space Series Inertia Switches

DESCRIPTION

- The space series inertia switches are intended for the stringent deep space environment. These fully qualified models can be tailored for any application requiring high reliability switching. No power is required for operation. Environmental stress acceptance testing is performed on every ship set and qualification unit.

APPLICATIONS

- Crash Detection, Impact, Velocity
- Centrifugal, Motion, Acceleration
- Fuzing, Arming, Stage Separation
- Power Cessation, Wake Up
- Launch
- Safety Cut Off
- Parachute Deployment
- Many More

AVAILABLE FEATURES

- Single or multi-axis
- Latching or momentary response
- Can carry AC or DC current
- High reliability and accuracy
- Small and lightweight
- Requires no power
- Terminals, cables, or connectors
